Houston, TX 77009

Dear Resident,

The City of Houston has been working with your neighborhood to develop a plan to improve traffic safety in your area. This project is the result of an application from your neighborhood for participation in the Neighborhood Traffic Management Program (NTMP).

As part of the process, a proposal to install speed cushions and traffic circles on various streets was developed and presented at several public meeting. Based on comments we received after the June 13th meeting, the plan was subsequently revised and another public meeting has been scheduled to present another revised plan to the neighborhood and discuss potential traffic impacts. On the back of this letter for your review is a map of the proposed locations. Per City Ordinance, the meeting notices are sent to residents and property owners within 0.5 mile of the proposed traffic devices; therefore, the proposed devices may or may not have any impacts on your driving patterns.

The NTMP Section would like to hear your concerns regarding the revised plan. Public comments will be taken during the public meeting or written comments can be mailed to our office during the 14-day comment period (form provided below). After the comment period, the Department of Public Works and Engineering will review all comments regarding the project and determine if the traffic calming devices should be installed and subsequently tested for effectiveness.

For further information, please call the NTMP Section at 832-395-3000. Thank you for your participation and interest in traffic safety on Houston's streets.
